Computer hardware,

Measuring performance,

Computer peripherals,

Storage devices/media,

Internet of Things

Full Name

Lizi Muradashvili

What piece of computer hardware is this? \*

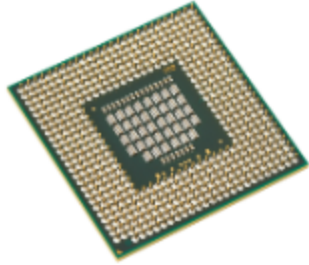

1 point

- ☐ Hard drive
- ☐ CPU
- ☐ RAM
- ☐ Graphics card
- ☒ Motherboard

What piece of computer hardware is this? \*

1 point

- ☐ Hard drive
- ☒ CPU
- ☐ RAM
- ☐ Graphics card
- ☐ Motherboard

What piece of computer hardware is this? \*

1 point

- ☐ Hard drive
- ☐ CPU
- ☒ RAM
- ☐ Graphics card
- ☐ Motherboard

What is the role of the optical drive? \*

1 point

- ☐ To temporarily store data that is frequently needed while the computer is switched on
- ☒ To read CD, DVD and Blu-ray Discs using a laser
- ☐ To permanently store data in the computer
- ☐ To carry out all the processing in the computer

What is the role of the RAM?

1 point

- ☐ To carry out all the processing in the computer
- ☐ To permanently store data in the computer
- ☒ To temporarily store data that is frequently needed while the computer is switched on
- ☐ To read CD, DVD and Blu-ray Discs using a laser

Select the largest unit. \*

1 point

- ☐ GB
- ☒ TB
- ☐ MB
- ☐ B

Select the smallest unit. \*

1 point

- ☐ GB
- ☐ TB
- ☒ b
- ☐ B

Which of the following CPU speeds is the fastest? \*

1 point

- ☐ 400 MHz
- ☐ 2.6 GHz
- ☐ 9000 KHz
- ☒ 3300 MHz

Which of the following CPU speeds is the slowest? \*

1 point

- ☐ 400 MHz
- ☐ 2.6 GHz
- ☒ 9000 KHz
- ☐ 3300 MHz

I want to take a hand-drawn image and send it to someone over email. Which peripheral do I need to do this? 1 point

- ☐ Webcam
- ☒ Scanner
- ☐ Printer
- ☐ Microphone

I want to show pictures of a school trip to the whole school on a big screen in the hall. Which peripheral do I need to do this? 1 point

- ☒ Projector
- ☐ Monitor
- ☐ Printer
- ☐ Speakers

What type of storage device is a DVD drive/DVD? 1 point

- ☐ Solid State
- ☒ Optical
- ☐ Magnetic

What type of storage device is a hard drive?

1 point

- ☒ Magnetic
- ☐ Solid State
- ☐ Optical

What type of storage device is a memory stick?

1 point

- ☐ Magnetic
- ☒ Solid State
- ☐ Optical

True or false? The Internet of Things is a device that connects to the Internet and interacts with other devices. 1 point

- ☒ True
- ☐ False

Which of the following are benefits of Internet of Things devices?

1 point

- ☐ Private data can be exploited
- ☐ Not all devices are compatible with each other
- ☒ People living in the same house can personalise their routines
- ☒ They can save people time
- ☐ The devices can cost a lot of money
- ☒ They can help the environment

Which of the following are drawbacks of Internet of Things devices?

1 point

- ☒ Private data can be exploited
- ☒ Not all devices are compatible with each other
- ☐ People living in the same house can personalise their routines
- ☐ They can save people time
- ☒ The devices can cost a lot of money
- ☐ They can help the environment

When automating processes using IoT devices, what is a trigger?

1 point

- ☐ The input device that collects the data
- ☐ What the output is if the condition is met
- ☒ What the data has to be for the action to be performed

When automating processes using IoT devices, what is a condition?

1 point

- ☒ The input device that collects the data
- ☐ What the output is if the condition is met
- ☐ What the data has to be for the action to be performed

When automating processes using IoT devices, what is an action? \*

1 point

- ☐ The input device that collects the data
- ☒ What the output is if the condition is met
- ☐ What the data has to be for the action to be performed

What is the role of the optical drive? \*

1 point

- ☐ To temporarily store data that is frequently needed while the computer is switched on
- ☒ To read CD, DVD and Blu-ray Discs using a laser
- ☐ To permanently store data in the computer
- ☐ To carry out all the processing in the computer

What is the role of the RAM?

1 point

- ☐ To carry out all the processing in the computer
- ☐ To permanently store data in the computer
- ☒ To temporarily store data that is frequently needed while the computer is switched on
- ☐ To read CD, DVD and Blu-ray Discs using a laser

Select the largest unit. \*

1 point

- ☐ GB
- ☒ TB
- ☐ MB
- ☐ B

Select the smallest unit. \*

1 point

- ☐ GB
- ☐ TB
- ☐ b
- ☒ B

Which of the following CPU speeds is the fastest? \*

1 point

- ☐ 400 MHz
- ☒ 2.6 GHz
- ☐ 9000 KHz
- ☐ 3300 MHz

Which of the following CPU speeds is the slowest? \*

1 point

- ☐ 400 MHz
- ☐ 2.6 GHz
- ☒ 9000 KHz
- ☐ 3300 MHz

I want to take a hand-drawn image and send it to someone over email. Which peripheral do I need to do this? 1 point

- ☐ Webcam
- ☒ Scanner
- ☐ Printer
- ☐ Microphone

I want to show pictures of a school trip to the whole school on a big screen in the hall. Which peripheral do I need to do this? 1 point

- ☒ Projector
- ☐ Monitor
- ☐ Printer
- ☐ Speakers

What type of storage device is a DVD drive/DVD? 1 point

- ☐ Solid State
- ☒ Optical
- ☐ Magnetic

What type of storage device is a hard drive?

1 point

- ☒ Magnetic
- ☐ Solid State
- ☐ Optical

What type of storage device is a memory stick?

1 point

- ☐ Magnetic
- ☒ Solid State
- ☐ Optical

True or false? The Internet of Things is a device that connects to the Internet and interacts with other devices. 1 point

- ☒ True
- ☐ False

Which of the following are benefits of Internet of Things devices?

1 point

- ☐ Private data can be exploited
- ☐ Not all devices are compatible with each other
- ☒ People living in the same house can personalise their routines
- ☒ They can save people time
- ☐ The devices can cost a lot of money
- ☒ They can help the environment

Which of the following are drawbacks of Internet of Things devices?

1 point

- ☒ Private data can be exploited
- ☒ Not all devices are compatible with each other
- ☐ People living in the same house can personalise their routines
- ☐ They can save people time
- ☒ The devices can cost a lot of money
- ☐ They can help the environment

When automating processes using IoT devices, what is a trigger?

1 point

- ☐ The input device that collects the data
- ☐ What the output is if the condition is met
- ☒ What the data has to be for the action to be performed

When automating processes using IoT devices, what is a condition?

1 point

- ☐ The input device that collects the data
- ☐ What the output is if the condition is met
- ☒ What the data has to be for the action to be performed

When automating processes using IoT devices, what is an action? \*

1 point

- ☐ The input device that collects the data
- ☒ What the output is if the condition is met
- ☐ What the data has to be for the action to be performed

Which of the following CPU speeds is the fastest? \*

1 point

- ☐ 400 MHz
- ☒ 2.6 GHz
- ☐ 9000 KHz
- ☐ 3300 MHz

Which of the following CPU speeds is the slowest? \*

1 point

- ☐ 400 MHz
- ☐ 2.6 GHz
- ☒ 9000 KHz
- ☐ 3300 MHz

I want to take a hand-drawn image and send it to someone over email. Which peripheral do I need to do this? 1 point

- ☐ Webcam
- ☒ Scanner
- ☐ Printer
- ☐ Microphone

I want to show pictures of a school trip to the whole school on a big screen in the hall. Which peripheral do I need to do this? 1 point

- ☒ Projector
- ☐ Monitor
- ☐ Printer
- ☐ Speakers

What type of storage device is a DVD drive/DVD? 1 point

- ☐ Solid State
- ☒ Optical
- ☐ Magnetic

What type of storage device is a hard drive?

1 point

- ☒ Magnetic
- ☐ Solid State
- ☐ Optical

What type of storage device is a memory stick?

1 point

- ☐ Magnetic
- ☒ Solid State
- ☐ Optical

True or false? The Internet of Things is a device that connects to the Internet and interacts with other devices. 1 point

- ☒ True
- ☐ False

Which of the following are benefits of Internet of Things devices?

1 point

- ☐ Private data can be exploited
- ☐ Not all devices are compatible with each other
- ☒ People living in the same house can personalise their routines
- ☒ They can save people time
- ☐ The devices can cost a lot of money
- ☒ They can help the environment

Which of the following are drawbacks of Internet of Things devices?

1 point

- ☒ Private data can be exploited
- ☒ Not all devices are compatible with each other
- ☐ People living in the same house can personalise their routines
- ☐ They can save people time
- ☒ The devices can cost a lot of money
- ☐ They can help the environment

When automating processes using IoT devices, what is a trigger?

1 point

- ☒ The input device that collects the data
- ☐ What the output is if the condition is met
- ☐ What the data has to be for the action to be performed

When automating processes using IoT devices, what is a condition?

1 point

- ☐ The input device that collects the data
- ☐ What the output is if the condition is met
- ☒ What the data has to be for the action to be performed

When automating processes using IoT devices, what is an action? \*

1 point

- ☐ The input device that collects the data
- ☒ What the output is if the condition is met
- ☐ What the data has to be for the action to be performed

What piece of computer hardware is this? \*

1 point

- ☐ Hard drive
- ☐ CPU
- ☒ RAM
- ☐ Graphics card
- ☐ Motherboard

What is the role of the optical drive? \*

1 point

- ☐ To temporarily store data that is frequently needed while the computer is switched on
- ☒ To read CD, DVD and Blu-ray Discs using a laser
- ☐ To permanently store data in the computer
- ☐ To carry out all the processing in the computer

What is the role of the RAM?

1 point

- ☐ To carry out all the processing in the computer
- ☐ To permanently store data in the computer
- ☒ To temporarily store data that is frequently needed while the computer is switched on
- ☐ To read CD, DVD and Blu-ray Discs using a laser
